

THE BLIND SHOP

Information Sheet

Pleated Blinds: Multi-Zone Tensioned

Multi-Zone tensioned pleated blinds allow you to adjust the blind so that the fabric sits where you desire, giving you lots of flexibility in light and privacy control. They can be opened from the top down and from the bottom up. The blinds are housed within frames that sit within the window. They are ideal for uPVC windows and doors and are popular in conservatories.

They are made with white top and bottom bars with integrated handles.

They are available in a high performance fabric that cuts UV and infrared light which reduces heat gain or in a blackout fabric which blocks the light.

Multi-Zone Tensioned Pleated Blinds

Tabs allow you to open the blind from the top or bottom
